EDUCATION

2020 - 2025

SRM UNIVERSITY

- Ph.D. in Bio-statistics and Epidemiology

2010 - 2012

SRM UNIVERSITY

- M.Sc. in Bio-statistics and Epidemiology

2003 - 2009

DR. MGR UNIVERSITY

- Batchelor of Siddha Medicine and Surgery

SKILLS

- R
- SAS
- Stata
- Python
- SPSS
- R Shiny

LANGUAGES

- English
- Tamil

PROFILE

Senior Biostatistician with 13+ years of experience in biostatistics, epidemiology, clinical research, and public health at the Madras Diabetes Research Foundation (MDRF), Chennai, India. Experienced in designing and implementing statistical methodologies for clinical trials, observational studies, and epidemiological research. Expertise in statistical analysis planning, sample size estimation, predictive modelling, machine learning, longitudinal data analysis, survival analysis, causal inference, diagnostic accuracy studies, and ROC curve analysis. Proficient in R, SAS, Stata, and Python, with a strong record of scientific collaboration, peer-reviewed publications, and mentoring researchers.

WORK EXPERIENCE

Madras Diabetes Research Foundation

2012 - PRESENT

Senior Bio-statistician

- Design and develop Statistical Analysis Plans (SAPs) for clinical, epidemiological, and public health research studies.
- Perform sample size estimation and statistical power calculations for observational studies, clinical trials, diagnostic studies, and epidemiological investigations.
- Conduct advanced statistical analyses using R, SAS, Stata, and Python.
- Develop and validate predictive models using statistical and machine learning techniques.
- Analyze longitudinal, survival, repeated measures, and causal inference data using appropriate statistical methodologies.
- Create publication-quality tables, figures, data visualizations, and reproducible analytical reports.
- Interpret statistical findings and contribute to the preparation of scientific manuscripts for peer-reviewed journals.
- Collaborate with clinicians, epidemiologists, data scientists, and multidisciplinary research teams throughout study design, analysis, and interpretation.
- Provide statistical consultation for research projects, grant proposals, and study protocols.
- Mentor postgraduate students, junior researchers, and research staff in statistical methods and programming.
